### **No ASTM D2000 properties available**

The nominal ranges listed in this document are based on the ISO 3601-5 Standard (Fluid power systems - O-rings - Specification of elastomeric materials for industrial applications). The given values are based on a limited number of tests on standard test pieces (2mm sheets). The data from finished parts can deviate from above values depending on the manufactories process and the component geometry.

The data represents our present empirical values. It is incumbent on the person placing the order to examine whether it is suitable for its intended purpose, before using the product. All questions regarding the guarantee of this product are in line with our terms and conditions, inasmuch as statutory provisions do not plan for something else.
