No ASTM D2000 properties available

Preferred area of applications: Radial Shaft Seals

Very good resistance in motor oils, which are based on mineral oil.

Attention !!!

In synthetic oils (Polyalkylenglykole / Polyalphaolefine) the max. temperature 80 °C should not be exceeded.

The given values are based on a limited number of tests on standard test pieces (2mm sheets) produced in the laboratory. The data from finished parts can deviate from above values depending on the manufactories process and the component geometry.

The data represents our present empirical values. It is incumbent on the person placing the order to examine whether it is suitable for its intended purpose, before using the product. All questions regarding the guarantee of this product are in line with our terms and conditions, inasmuch as statutory provisions do not plan for something else.
