

Double wiper AD60

DESCRIPTION

- Double-acting
- Sealing and wiper edge
- Without metal angle ring
- O-ring as sealing and preloading element
- Material base element: PTFE bronze
- O-ring material: NBR

FUNCTION

- Wiping off impurities on the piston rod during the retraction movement
- Reduction of residual oil film due to second lip
- Pretensioning provides static tightness
- Pressure relief hole recommended for return of residual oil

PRODUCT ADVANTAGES

- Good wiping properties against dirt
- Low friction
- No stick-slip effect
- Particularly suitable for high stroke speeds and frequencies
- Reliable design with broad application spectrum for moderately demanding applications in general industry

- Good price/performance ratio
- Manufactured by certified external suppliers

APPLICATIONS

- Suitable for short-stroke cylinders with high sliding speeds and high stroke frequency

APPLICATION LIMITS

- Temperature [°C]: -30 to 100
- Gliding speed [m/s]: max. 15
- The values given here are maximum values and may not all be reached at the same time.

MEDIA RESISTANCE

- Hydraulic oils according to DIN 51524 part 1-3
- Lubricating oils
- Lubricating greases based on minor oils
- Flame-retardant hydraulic fluids HFA, HFB, HFC according to VCMA 24317
- Hot air and steam

CONFORMITY AND CERTIFICATES

- Please consult the material data sheet valid for the respective material for current information on approvals and certificates, as this information depends on the compound.

DESIGN GUIDELINE

- Cylinder housing and piston rod/piston must be chamfered to prevent damage
- Length and angle of the installation chamfers must be in accordance with installation space drawing
- Surface roughness of rod according to specifications of seal used
- Surface roughness of groove flanks $Ra \leq 4 \mu m$
- Surface roughness of groove base $Ra \leq 2,5 \mu m$

DICHTOMATIK

Double wiper AD60

INSTALLATION GUIDELINE

- Axially accessible installation space required for small diameters
- Deburr sharp edges, provide with seamless chamfers and radii
- Clean the installation space carefully before installation, remove dust, dirt, metal chips, etc.
- When installing in closed installation spaces, heat the PTFE part in advance so that the seal can be installed quickly and easily by forming it into a kidney shape
- Do not roll the O-ring over the mounting surfaces, do not twist it when snapping into the groove
- The seal must not be kinked during installation
- Calibrate after assembly

STORAGE ADVISE

- Storage temperature <math><25^{\circ}\text{C}</math>
- No direct heat sources
- No direct sunlight
- No condensation in the storage room
- No exposure to ozone or ionizing radiation
- Recommendations based on the revision of ISO 2230 dated 16.09.1992
